

Alexandra Children's Centre Philosophy Statement

The Early Childhood Educators, children and families of Alexandra Children's Centre work together in an atmosphere of mutual respect. This facilitates self confidence and positive self esteem.

The Early Childhood Educators of Alexandra Children's Centre believe that children learn through active hands-on play and exploration of their environment. This follows the Emergent philosophy which is implemented throughout the centre.

The Emergent curriculum recognizes that children are active learners who learn best from activities that they plan and carry out themselves. The Teacher facilitates the program by providing and arranging materials, interest areas and opportunities for the children to plan and carry out their own activities.

The Centre believes in fostering active learning, multi-culturalism, integration, creativity, independence, and family involvement through providing experiences for positive interactions between children, staff, families, the Centre and community.
